Orbit Digital - Proposal

RFP NWH-AI-2026-01: Enterprise AI Platform & Implementation
Prepared for Northwind Holdings (fictional) | Submitted 6 October 2026

SYNTHETIC PROPOSAL - fictional supplier created for an academic exercise. Not real company data.

1. Executive Summary

Orbit Digital brings more than twenty years of enterprise transformation experience to Northwind. Our OrbitIQ platform has been deployed for some of the region's largest retail, logistics and healthcare organisations, and our references speak for the quality of our work.

2. Proposed Architecture

OrbitIQ is a retrieval-augmented generation platform built on a proven architecture used across our client base. It combines document indexing, semantic search and a large language model to answer employee questions with references to source documents.

3. Integrations

Orbit will integrate OrbitIQ with Northwind's existing systems as required. The specific connectors, integration patterns and identity approach will be determined during discovery.

4. Implementation Approach and Timeline

Stage	Indicative duration
Discovery	4 weeks
Build	10 weeks
Deploy	6 weeks

Detailed milestones will be agreed at the end of discovery.

5. Team Structure

A blended onshore and offshore team sized to Northwind's requirements, led by a named delivery director with fifteen years of programme experience.

6. Pricing and Commercial Assumptions

Item	Amount (USD)
OrbitIQ subscription, per year	275,000
Implementation, time and materials estimate (+/- 15%)	240,000
Approximate three-year total	1,065,000

Integration costs are excluded and will be quoted after discovery.

7. Security and Compliance

Orbit Digital is ISO/IEC 27001 certified and holds a SOC 2 Type II report. Standard controls include encryption, role-based access and audit logging. Data residency follows the client's choice of region.

8. Risks and Mitigations

The main risk is integration scope uncertainty until discovery is complete. Orbit will manage this through its standard change-control process.

9. Support Arrangements

24x5 support with a two-hour response target for P1 incidents.

10. Experience and References

Founded in 2004, Orbit has delivered more than 140 enterprise digital programmes, including 22 enterprise AI and search deployments.

- Kestrel Retail Group: 35% reduction in internal IT ticket volume within six months.
- Sterling Logistics: knowledge assistant used by 6,000 warehouse and office staff.
- Avalon Health Network: policy search for 9,000 clinical and administrative employees.

All named references are fictional for this exercise.
